

4825 Glenbrook Road Weekly Update for Jan. 16, 2015

This week crews conducted high probability excavation work and recovered one piece of American University Experiment Station-related glassware (see attached picture). In addition to excavation work, crews filled roll off containers with previously excavated soil (see attached pictures). There were no detections of chemical agents or industrial compounds in the air monitors.

On Thursday, we briefed to the D.C. Advisory Neighborhood Commission (ANC) 3D about our permit application to install the new fence on the Glenbrook Road side of the project. The ANC approved a resolution recommending the fence be approved by the D.C. Department of Transportation. We still anticipate receiving the permit soon and hope to install the fence by mid-February.

To reach a Spring Valley Army Corps representative in the event of an after-hours emergency, please call the project's 24-hour hotline: 1-888-393-0059. During business hours, please continue to call the Spring Valley Community Outreach Team at 410-962-0157.

Safety continues to be our number one priority at the site. Throughout every phase of the project, all necessary precautions are taken to ensure the safety of the site workers, the residents of the community, and those driving by.
